

DANIEL YEWENU

Cybersecurity Analyst | Penetration Tester | Security Operations

yewenusewedo@gmail.com · +2348132027529 · linkedin.com/in/daniel-yewenu-45a370250 · github.com/Thinkersjnr1

PROFESSIONAL SUMMARY

Results-driven Cybersecurity Analyst and Penetration Tester with hands-on experience across web application security, network forensics, API security, and SIEM engineering. Holds 10+ industry certifications including Cisco Ethical Hacker, CyberOps Associate, ISC(2) CC, and Certified Ransomware Protection Officer (CRPO). Built enterprise-grade security tools including an ELK Stack SIEM, a Reinforcement Learning adaptive firewall, and a Zero Trust architecture framework. Demonstrated 90%+ vulnerability detection rates in live penetration testing engagements, and has applied strategic frameworks (SWOT, McKinsey 7S) to enterprise cybersecurity readiness assessments.

CORE COMPETENCIES

- | | |
|-------------------------------|----------------------------------|
| ✓ Penetration Testing & VAPT | ✓ SIEM Engineering (ELK Stack) |
| ✓ API Security Testing | ✓ Zero Trust Architecture |
| ✓ Ransomware Defense (CRPO) | ✓ Threat Intelligence & Modeling |
| ✓ Network Traffic Forensics | ✓ Post-Quantum Cryptography |
| ✓ Incident Response & SOC Ops | ✓ Security Strategy & Governance |

PROFESSIONAL EXPERIENCE

Cybersecurity Intern

Aug 2025 – Aug 2026

Employment Express Verband LLP · Remote — Lagos State, Nigeria

- Conducted full-scope VAPT on partner projects including CrexBet and LTSU, identifying critical vulnerabilities across web application and network attack surfaces.
- Executed structured penetration tests using Burp Suite, OWASP ZAP, and Nmap, mapping findings to OWASP Top 10 with CVSS-scored risk ratings and actionable remediation recommendations.
- Delivered comprehensive pentest reports and security assessments directly to partner stakeholders, enabling informed risk-treatment and mitigation decisions.
- Supported continuous security improvement across partner environments through vulnerability triage, retesting, and follow-up documentation.

Network Security Intern

Jun 2025 – Aug 2025

Redynox · Remote — India

- Conducted web application vulnerability assessments on WebGoat using OWASP ZAP on Kali Linux, identifying SQL Injection, XSS, and CSRF vulnerabilities with full remediation documentation.
- Performed deep-packet network traffic analysis with Wireshark, detecting unauthorized port scans and anomalous activity patterns across live network environments.
- Delivered stakeholder-ready security reports with firewall rule optimizations, encryption protocol recommendations, and network segmentation blueprints.
- Designed IDS deployment architectures to strengthen organizational perimeter defenses.

Cybersecurity Intern — Job Shadowing 2.0

Apr 2025 – May 2026

Interswitch Group · Remote — Lagos State, Nigeria

- Selected for Interswitch's Job Shadowing 2.0 program, a structured technology and career development initiative spanning real business problem-solving, industry frameworks, and strategic thinking beyond pure technical execution.
- Completed sessions on personal branding, career strategy, and structured problem-solving frameworks (root cause analysis, fishbone diagrams), facilitated with Human Capital Partners.

- Developed and presented "CyberSecure Nexora," a comprehensive fintech cybersecurity strategy spanning AI-driven fraud detection, Zero Trust architecture, and compliance across DORA, NDPR, PCI-DSS, ISO 27001, and GDPR.
- Applied SWOT analysis and the McKinsey 7S framework to assess organizational cybersecurity readiness, identifying capability gaps and building a phased 2025–2028 implementation roadmap with defined KPIs.
- Recommended structural improvements including direct CISO-to-CEO reporting alignment, periodic Red Team/Blue Team exercises, and a cross-functional Cybersecurity Advisory Board.

Cybersecurity Intern

Feb 2025 – Mar 2025

Hacktify · Remote — Lagos, Nigeria

- Executed penetration testing using Burp Suite, Nmap, and OWASP ZAP, achieving a 90% vulnerability detection rate across all assessed systems.
- Performed end-to-end VAPT of Hacktify's infrastructure, uncovering critical misconfigurations aligned to OWASP Top 10.
- Produced risk-prioritized remediation documentation with mitigation strategies mapped to industry-standard frameworks.
- Awarded Hacktify Penetration Testing Certificate for outstanding performance.

SELECTED PROJECTS

Enterprise SIEM Dashboard — ELK Stack

Dec 2025

Elasticsearch · Logstash · Kibana · Python

- Built a full-featured SIEM platform using the Elastic Stack — Elasticsearch for log storage/search, Logstash for ingestion/processing, and Kibana for real-time security dashboards.
- Engineered data pipelines correlating security events across distributed sources for rapid threat detection and incident response.

Adaptive Firewall via Reinforcement Learning

Dec 2025

Python · Reinforcement Learning · Network Security

- Developed an autonomous adaptive firewall using RL to learn optimal traffic filtering policies in real time, significantly reducing manual rule management overhead.
- Engineered the RL reward structure to balance security posture against throughput for sustainable autonomous operation.

Zero Trust Architecture — Hybrid Environment

Dec 2025

HCL · NIST SP 800-207 · AWS · O365

- Designed a NIST SP 800-207-compliant Zero Trust framework for hybrid environments (AWS/O365/VPN), addressing CVSS 8.1–8.8 threat vectors including spoofing and privilege escalation.
- Delivered phase-by-phase blueprints with STRIDE threat modeling, identity verification controls, and micro-segmentation strategies.

Web Application Penetration Testing

2025

Burp Suite · OWASP ZAP · Nmap · Kali Linux

- Conducted a comprehensive OWASP Top 10 security assessment of a live web application, delivering a CVSS-scored pentest report with PoC exploits and prioritized remediation guidance.

Lattice-MQ Hybrid (LMH) Encryption Algorithm

2025

Python · NumPy · Post-Quantum Cryptography

- Designed quantum-resistant encryption combining lattice-based and MQ cryptography, achieving 80% resistance to neural cryptanalysis. Proposed for IoT and cloud security deployment.

CyberSecure Nexora — Fintech Security Architecture

2025

Threat Modeling · SIEM · Risk Management

- Architected an enterprise cybersecurity strategy for a fintech case study with STRIDE threat models, a phased roadmap, success KPIs, and board-level executive deliverables, as part of the Interswitch Job Shadowing 2.0 program.

TECHNICAL SKILLS

Offensive Tools	Burp Suite, OWASP ZAP, Nmap, Metasploit, mitmproxy2swagger, SQLmap
SIEM & Monitoring	Elastic Stack (ELK), Splunk, Kibana, Logstash, Wireshark
Platforms & OS	Kali Linux, Ubuntu, Windows Server, AWS (fundamentals)
Programming	Python, Bash scripting, NumPy (cryptography & RL implementations)
Frameworks	OWASP Top 10, MITRE ATT&CK, NIST SP 800-207, NIST CSF, PCI DSS, GDPR
Specializations	API Security, Post-Quantum Cryptography, Ransomware Defense, AI/LLM Security, Zero Trust
Strategy Frameworks	SWOT Analysis, McKinsey 7S, Root Cause Analysis, Fishbone Diagrams

CERTIFICATIONS

- Certified Computer Forensics Analyst (CCFA) — eSecurity Institute Sep 2026
- Certified Ransomware Protection Officer (CRPO) — EU Cyber Academy Dec 2025
- Securing LLM and NLP APIs — APIsec University Jul 2025
- Building Security into AI — APIsec University Jul 2025
- API Security for PCI Compliance — APIsec University Jul 2025
- Cisco CyberOps Associate — Cisco Networking Academy May 2025
- Cisco Certified Ethical Hacker — Cisco May 2025
- Security Operations & Defense Analyst — Splunk Sep 2023
- Intro to Critical Infrastructure Protection — OPSWAT Academy Aug 2023
- Certified in Cybersecurity (CC) — ISC(2) Dec 2022
- GDSC Cybersecurity Bootcamp — Google Developer Student Clubs Feb 2023

EDUCATION

B.Sc. Cybersecurity <i>Lead City University · Ibadan, Nigeria</i>	Expected November 2026
Cybersecurity, Ethical Hacking & CyberOps Associate <i>Cisco Networking Academy</i> • Coursework: Network Security, Ethical Hacking, CyberOps (incident response, threat detection), Security Best Practices. • Badges: Cisco CyberOps Associate Badge, Cisco Ethical Hacker Badge.	2025
Cybersecurity, AI & Compliance <i>APIsec University</i> • API security testing, penetration testing, AI/LLM security, and PCI compliance using Postman, Burp Suite, ZAP Proxy.	Jun 2024 – Sep 2025
